PROFESSIONAL SUMMARY

DevOps Engineer Trainee with practice in AWS, Linux, Terraform, Kubernetes, Helm, and CI/CD.
Built a public portfolio for GitOps, progressive delivery, multi-environment Terraform, observability,
dry-run cost reporting, backup verification, and secret rotation. Local tests passed. Cloud apply was not run.

TECHNICAL SKILLS

AWS: EC2, IAM, VPC, S3, EKS, ECR, SSM, CloudWatch, CloudTrail, ELB, Auto Scaling, Organizations, Backup, Secrets Manager
DevOps: Docker, Kubernetes, Helm, Argo CD, Terraform, Ansible, Git, GitHub Actions, GitLab CI, Jenkins, GitOps
Observability and security: Prometheus, Grafana, Loki, Alertmanager, least-privilege IAM, secret scanning
Languages and OS: Python, Bash, Linux

PROFESSIONAL EXPERIENCE

DevOps Engineer Trainee | Paytm Payments Services | New Delhi, India | Feb 2026 - Present
Automated infrastructure operations across AWS accounts with Ansible, Systems Manager, and infrastructure-as-code practice.
Built reusable Ansible roles for Qualys Cloud Agent, Cortex XDR, and SSM Agent deployment and lifecycle tasks.
Coordinated quarterly Linux patching from vulnerability review and change approval through post-patch verification.
Wrote Python and Bash automation for inventory, IAM review, and security-gap reporting.

PROJECTS

GitOps EKS Platform | Terraform, Helm, Argo CD, Prometheus, GitLab CI | 2026
Designed VPC, IAM, and EKS modules, a probed demo service, and Argo CD plus Prometheus manifests. Validated locally. Did not apply AWS.
Multi-Environment Terraform | Terraform, IAM, S3 state design | 2026
Separated dev, staging, and prod-style settings from reusable modules. Tag checks reject bad config. State lockfile is documented, not executed.
Observability and Cost Reporter | Prometheus, Grafana, Loki, Python | 2026
Versioned golden-signal dashboards and alerts, and a local test alert. Dry-run reports flag idle candidates and loose resources without a savings claim.
Earlier builds | Jenkins, Docker, Kubernetes, FastAPI, CUR, Athena, Vault, S3 | 2025-2026
Practiced CI/CD pipelines, a Jira operations dashboard, FinOps analytics design, and Vault backup automation. Portfolio tests do not re-measure that work.

EDUCATION

Master of Computer Applications, Cloud Computing | Manipal University | 2024 - 2026
Bachelor of Computer Applications, Data Science | K.R. Mangalam University, Gurugram | 2021 - 2024

CERTIFICATIONS

Post Graduate Program in Data Science and Machine Learning
AWS Certified Cloud Practitioner and HashiCorp Terraform Associate: listed as in progress on the source resume
